Sermon Studio Features:

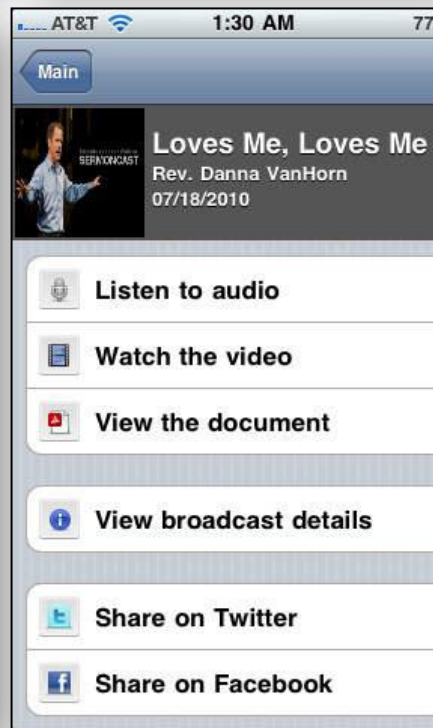

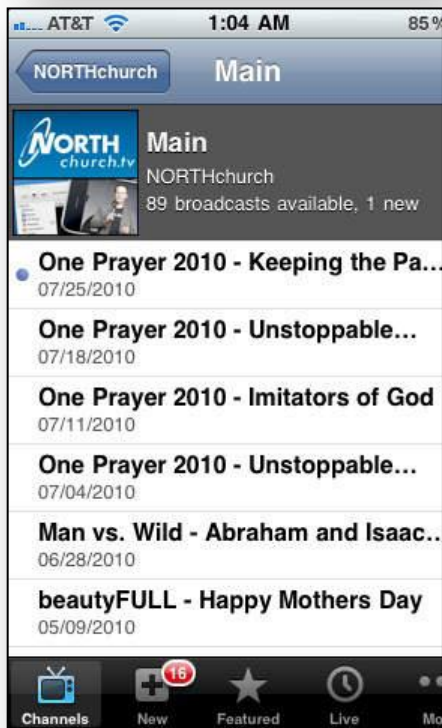

Mobile Apps

For Android and iOS

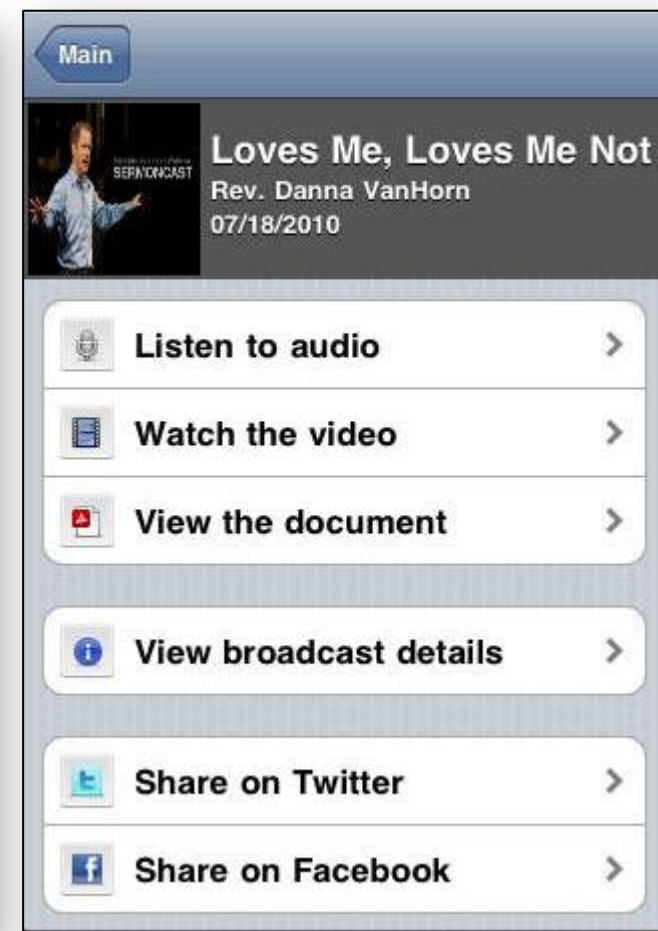

We have standard apps for both Android and iOS devices, available for free through the Apple iStore and Google Play.

The Channels tab displays the ministries you are subscribed to when you start the app.

The New tab displays new messages from ministries you are subscribed to.

The Live tab displays ministries that are scheduled to go live that day.

The custom apps work much the same way, but only display one ministry's media.

Additional Channels and the Live options will activate if those options active within the ministry's account.

The differences in the custom apps...

Android

– recently added content

Integrated into the device:

Menu -> About

– contact information

Search

– Search for messages

iOS

In App:

Channels

– Media – ministry channels

– New – recently added content

– Live – on air broadcasting

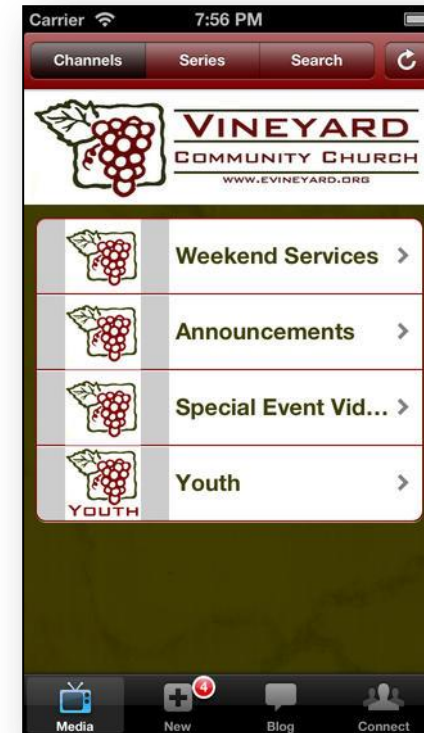

– Connect – contact information

Series

– Sort messages by series (if this option is active)

Search

– Search for messages

Download the Sermon Network apps:

– [Sermon Network app for Android](#)

– [Sermon Network app for iOS](#)

Here are some of the custom apps:

Android – [Google Play Store](#)

iOS – [Apple iTunes Store](#)

To request info for your own custom app, please click here:
